

HEALTHCHECK XTREAM

Healthcheck Xstream by MindStream Analytics is an opportunity for an independent third party (that's us!) to review your EPM and BI investments and outline current gaps & limitations the organization may face. This comprehensive 2-DAY session consists of discussions guided by a pre-defined checklist of key inspection points, associated with best practices, for specific types of applications. The discussion is led by a seasoned MindStream team member who will interview and collect feedback from you to begin the process of identifying the root cause of any issues within an EPM or BI application.

The following will be delivered as part of **Healthcheck Xstream**:

TWO (2) DAYS of review

Healthcheck Xstream Report, which includes:

- EXECUTIVE SUMMARY with overall health status
- Findings which identifies **SPECIFIC** issues impacting the health of an application
- Recommendations categorized into a **STRATEGIC ROADMAP** of short term and longer term enhancements

Report Summary Meeting with the customer to walk through the Healthcheck Xstream Report, and discuss any questions, or next steps.

Here is one example of what our customers have experienced as a result of this check:

A customer asked MindStream Analytics to review an Essbase calculation that took 24 hours to compete. Based upon the expert opinions provided in the MindStream Healthcheck Xstream Document, the calculation was modified which resulted in a reduction of the overall processing time to LESS THAN 5 Minutes!
